APPROPRIATIONS, 1891.

The following sums are recommended to meet current expenses the ensuing year : —

Support of poor	\$1,200 00
Support of schools	1,500 00
Repair of highways	1,200 00
Repair of bridges	200 00
Repair of schools	100 00

Poor Soldiers' families	300 00
Town incidentals	550 00
School — East Head	150 00

SCHOOLS.

At the time of closing the accounts, March 7th, there was an undrawn balance of upwards of \$800, owing to several schools not being out.

POOR.

There has been a large reduction in the expense of the poor. The overseers are convinced that they can be supported at less cost outside the almshouse than in, under the present condition of things. 166 tramps have been fed and lodged at an expense of \$41.50.

FIRE-PROOF VAULT.

Instead of building a fire-proof vault as voted by the town, the Selectmen bought a large safe at quite a saving of expense, and is believed to answer all purposes for many years, thereby hoping to receive the approval of the town.

The past year may be considered rather a favorable one, notwithstanding our case with the city of Taunton was decided against us by the Supreme Court, upon questions of law.

It will be noticed that our assets over liabilities have increased \$500.00, the first year, owing in the main to decreased cost of the poor.

Respectfully submitted,

ALBERT T. SHURTLEFF, Town Clerk.

REPORT OF SCHOOL COMMITTEE.

To the Citizens of Carver:—

The following report of your School Committee, for the year ending March 1st, 1891, is respectfully submitted. Your committee are not unmindful of the sacredness of the trust you committed to their care, and of the responsibility you laid upon them; and if they have failed to accomplish all that could be desired, they are conscious of a desire and purpose to be faithful to the interests committed to them.

We are glad to report that our schools, as a whole, have made creditable improvement during the year. The teachers have labored earnestly, and the scholars that have attended constantly, have made good progress.

In most of the schools there has been no change of teachers during the year; as it is not only desirable to secure, but also to retain good teachers.

There has been a change in some of the text books. The farmer and the mechanic can accomplish more with good than with poor tools. The farmer can do more and better work with the modern than with the plow our fathers used years ago. There has been as great improvement in the "tools" used in the school-room as on the farm or in the workshop; and we know of no good reason why the children in our schools should not have as good text-books as children in other places. The change has been made without great expense to the town, and its good results are being seen in the increased interest and better work done in the schools.

Some of the schoolhouses have been improved by paint and necessary needed repairs; and more in this line is sadly needed. It will not require a large outlay annually to put and keep our schoolhouses in good condition, so that they will be not only comfortable and convenient, but also attractive and a credit to the town.

We are glad to report an increase in the length of our schools. Last year they had thirty, this year thirty-two weeks.

We rejoice in the "Increased appropriation" for schools; it is a step in the right direction; and we would recommend that the appropriation be increased annually till our schools shall be able to have at least three terms of twelve weeks each, or thirty six weeks in the year.

Your committee would suggest for your consideration, and perhaps future action, whether it would not be better for the schools, and more economical, to discontinue some of them and transport the scholars to other schools.

There is one thing that is a great hindrance to the improvement and efficiency of our schools, and that is the "disinterestedness" or indifference of many parents in regard to the education of their children. They manifest little or no interest in their school, never visiting it, and for trivial excuses allow their children to be absent from school, thus causing an injury and loss both to their children and the school that cannot be easily estimated. From eight to fourteen is the lawful and golden age to gain the elements of a common school education, which those who make our laws seem so anxious every child in the Commonwealth should have. Parents who keep their children from school during these years — if they are physically able to attend — are inflicting an injury upon them that can never be repaired; it is a loss to the child that never can be made good. It is also a great wrong done to the community, to permit a child to grow up in ignorance when school privileges are so freely provided for all.

In this connection your committee would call special attention to an act of the legislature passed last winter, which is as follows: "Every person having under his control a child between the ages of eight and fourteen years, shall annually cause such child to attend some public day school in the city or town in which he resides, and such attendance shall continue for at least thirty weeks of the school year, if the schools are kept open that length of time, with an allowance of two weeks' time for absence not excused by the superintendent of schools, or the school committee, and for every neglect of such duty the person offending shall, upon the complaint of the school committee or any truant officer, forfeit to the use of the public schools of such city or town, a sum not exceeding twenty dollars; but if such child has attended for a like period of time a private day school, approved by the school committee of such city or town, or if such child has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or has already acquired the branches of learning required to be taught in the public schools, or his physical or mental condition is such as to render such attendance inexpedient or impossible, such penalties shall not be incurred." -

At the annual town meeting \$150 was appropriated for a school at East Head, or for the transportation of the scholars to other schools, as might be deemed best. Mr. Job A. Turner generously provided a suitable building, and a teacher was employed. The whole number of scholars that have attended is six. The school has been in session thirty weeks, and as much was accomplished as could be expected under the circumstances.
